PROFESSIONAL SUMMARY

Computer Science undergraduate specialising in Computer Networking, with practical experience in full-stack web development, cloud applications, concurrent client-server systems and secure IT infrastructure. Skilled in React.js, Node.js, Express.js, C#/.NET, MySQL, REST APIs, JavaScript, Linux, NGINX, AWS S3 and Azure Functions. Seeking an entry-level role as a Junior Software Engineer, Web Developer, IT Support Technician, Cloud Support Associate or Junior Network Engineer.

KEY SKILLS

Programming & Web: HTML, CSS, JavaScript, React.js, Node.js, Express.js, C#/.NET, Chart.js | Databases & APIs: MySQL, JSON, REST APIs, API integration, database design
Cloud & Infrastructure: Azure Functions, AWS S3, Linux, NGINX, UFW, SSH hardening, Fail2Ban, TLS/SSL, Bash, Cron | Concepts: Full-stack development, client-server architecture, concurrent programming, Clean Architecture, testing, debugging, Git/GitHub
Professional Skills: Problem solving, analytical thinking, technical troubleshooting, communication, teamwork, time management, quick learning, adaptability.

EDUCATION

BSc (Hons) Computer Science - Computer Networking | *University of Staffordshire* | 2023 - 2026
(Expected)

Relevant focus: Computer networking, software development, web development, databases, cloud computing, cybersecurity, IT infrastructure, REST APIs and system design.

International Diploma in ICT | *ICBT Campus* | 2024

General ICT Foundation Programme | *APIIT Sri Lanka* | 2022 - 2023

Certificate in Computer Networking | *BCI Campus* | 2022

G.C.E. Ordinary Level | *St. Joseph's College* | 2017 – 2018

ACADEMIC PROJECTS

Formula 1 Analytics Dashboard - Final Year Project | *React.js, Node.js, Express.js, MySQL, Chart.js, REST APIs*

- Developed an interactive Formula 1 analytics dashboard using historical Kaggle data, with season statistics, driver comparison, driver-to-track analysis, authentication and profile features.
- Built a React.js frontend, Node.js/Express.js REST API backend and MySQL database to retrieve structured JSON data and display interactive Chart.js visualisations.
- Tested the system through functional, API, database, responsive and usability testing to improve accuracy, reliability and user experience.

Concurrent Multi-User Library Management System | *C#/.NET, Windows Forms, TCP, MySQL, JSON*

- Refactored a single-user Clean Architecture application into a multi-tier client-server system supporting multiple concurrent users.
- Developed a Windows Forms GUI to manage books, members, loans, borrowing, returning and renewing records with TCP and JSON request/response communication.
- Applied Task.Run, ConcurrentQueue, worker thread processing and AutoResetEvent to manage concurrent requests safely and reduce race-condition risks.

Cloud-Based Job Application and Contractor Onboarding System | *HTML, CSS, JavaScript, Node.js, Azure Functions, AWS S3, JSON, Nodemailer*

- Built a distributed cloud web application prototype for applicant submission, CV/photo uploads, staff dashboard review, status updates and approval notifications.
- Used Azure Functions and Node.js for backend API logic, AWS S3 for cloud file storage, JSON for data persistence and Nodemailer for automated email communication.

Secure IT Infrastructure for New Business Machine Ltd | *Ubuntu Linux, NGINX, UFW, SSH, Fail2Ban, TLS/SSL, Bash, Cron*

- Configured a secure Linux infrastructure with NGINX web server, UFW firewall rules, SSH hardening, Fail2Ban intrusion prevention, TLS/SSL settings and access restrictions.
- Created and tested an automated backup and recovery system using Bash scripting, cron scheduling and encrypted backup files.

Sakura Breeze Restaurant Website | *HTML, CSS, JavaScript, Responsive Web Design*

- Created a responsive restaurant website to showcase menu items, services and contact details with user-friendly navigation and mobile-ready page layouts.

CERTIFICATIONS AND TRAINING

Networking Foundations: Networking Basics | *LinkedIn Learning* | *May 2025*

Covered networking fundamentals, infrastructure, protocols, connectivity, troubleshooting and network administration principles.

ADDITIONAL STRENGTHS

Problem solving | Analytical thinking | Technical troubleshooting | Communication | Teamwork | Time management | Quick learning | Adaptability | Attention to detail
